au Initial Setting

By setting au ID, you can use various services provided by au such as "au Kantan Kessai" which allows you to purchase apps from the au スマートパス (au Smart Pass) or Google Play. Main setting items are as follows.
• If you skip the operation of "au Initial Setting" at the time of purchase, you can set au ID later. In that case, operate from the home screen → [基本機能 (Basic functions)] → [Settings] → [au Settings Menu] → [au Initial Setting]

1
Check / Uncheck [Update] → [GET STARTED]

2
[Sign in]*1

3
Enter the security code*2 → [次へ (Next)]

4
Enter the password → [同意して次へ (Agree)]

5
[次へ (Next)]

6
[次へ (Next)]

7
[ALLOW]*3

8
Check apps to install*4 → [Next]

9
Check items to configure → [Next]

10
[Finish]*5

*1 If you registered au ID in the past, step 3 and 4 are not displayed. Go to step 5.
*2 The security code is a four-digit number written at subscription.
*3 A confirmation screen for requesting access permission will be displayed several times. In this case, do the same as step 7.
*4 When "Select apps" is displayed on "Backed up" field, tap to check the app.
*5 If you stored your data to au server using "Data Storage App", tap "Restore from backup now" to restore the data.
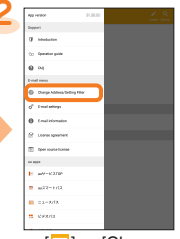

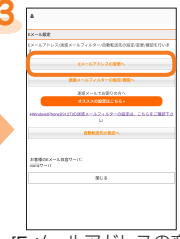

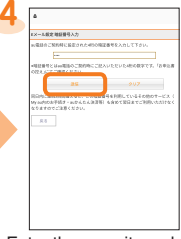

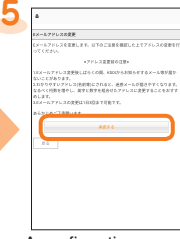

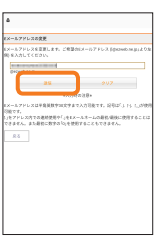

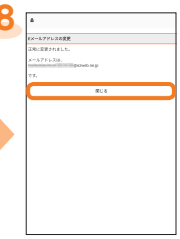

au mail

To use au mail, subscription to LTE NET is required.
If you did not subscribe it when you purchased the product, contact an au shop or Customer Service Center.
Your au mail address is determined automatically after initial setting. You can change the au mail address later.
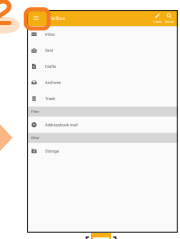

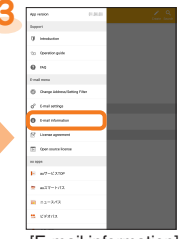

■ Initial settings   * You cannot make initial settings in Wi-Fi® communication.

1 Home screen → [✉]

2 The license agreement of au mail app appears → check the contents, [AGREE] → follow the on-screen instructions to operate, and go next.

3 Check au mail address, and [閉じる (Close)]
* If a confirmation screen is displayed, follow the on-screen instructions.

4 au mail mailbox is displayed.

■ Changing your au mail address

1 Home screen → [✉]

2 [≡] → [Change Address/Setting Filter]

3 [E メールアドレスの変更へ (To Change E-mail address)]

4 Enter the security code → [送信 (Send)]

5 A confirmation screen for changing E-mail address appears → check the contents, then [承諾する (I accept)]
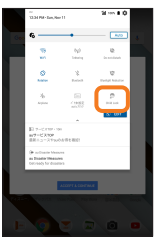

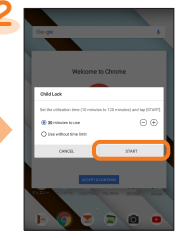

6 Enter au mail address → [送信 (Send)]

7 [OK]

8 [閉じる (Close)]

■ Checking your au mail address

1 Home screen → [✉]

2 [≡]

**3** [E-mail information]

4 au mail address is displayed.

Child Lock

Set to use only one app to prevent a child from launching other apps mistakenly. In addition, set the utilization time to prevent excessive use for many hours.

■ Setting Child Lock

1 Launch an app to be pinned, slide down the status bar, and then the notification panel is displayed. → [Child Lock]
* When you launch the Child Lock for the first time, "How to use" is displayed. After reading it, close the Child Lock once, and repeat step 1.

2 Set the utilization time to turn on the Child Lock, and [START]
* When the utilization time is approaching, the product vibrates. When the utilization time is over, the product is locked automatically.

■ Canceling Child Lock

1 Long-touch ◁ and ☐ simultaneously.

2 Enter the displayed characters, and [OK]
* When the "unlock screen for grown-ups" is set to OFF, the characters are not displayed.

Setting Display

Set the screen brightness and backlight time of the screen.

■ Adjusting the screen brightness level

1 Home screen → [基本機能 (Basic Function)] → [Settings]

2 [Display] → Slide the indicator of "Brightness level" left/right
* To make brighter, slide the indicator right. To make darker, slide the indicator left.

■ Increasing the backlight time of the screen

1 Home screen → [基本機能 (Basic Function)] → [Settings]

2 [Display] → [Sleep] → Select the lighting time
* When [Rollbahn Flap case] → set [Backlight auto extension] to [ON], the backlight time of the screen is extended automatically when the case is standing.

Setting Wi-Fi®

Use your home Wireless LAN (Wi-Fi®) or public wireless LAN to connect to the Internet.
Main settings are as follows.

WPS system	Use for registration of access point compatible with Wi-Fi Protected Setup™ with WPS mark.

* If you turn on wireless LAN (Wi-Fi®) function, battery consumption increases. You are recommended to turn wireless LAN (Wi-Fi®) function to OFF when not using wireless LAN (Wi-Fi®) function.

1 Home screen → [基本機能 (Basic Function)] → [Settings]
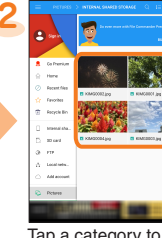

2 [Wi-Fi]

3 Turn "ON" and [ ]

Available Wi-Fi® networks are listed. Select a Wi-Fi® network to connect → Enter a password as required → [CONNECT] to connect the Wi-Fi® network.
If a Wi-Fi® network you want to connect cannot be detected, tap "Add network" and connect the Wi-Fi® network manually.

■ Using WPS system access point

4 [Advanced] → [WPS Push Button] / [WPS Pin Entry]

5 For using WPS button, tap "WPS Push Button" and then keep pressing WPS button of access point to set to WPS mode. An access point is automatically detected and registration starts.
For entering WPS PIN, tap "WPS Pin Entry" and enter displayed PIN code for access point, then registration starts.

Viewing/Playing Data

By transferring data from the previously used au phone to a microSD™ memory card, you can insert the microSD memory card into this product and view/play' still image or movie data using "File Commander" in the product. When you activate for the first time, the Terms and Conditions appears. Follow the on-screen instructions.
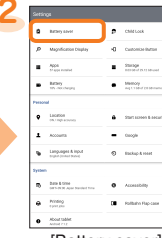

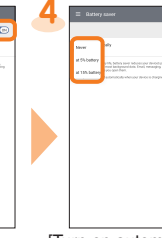

1 Home screen → [基本機能 (Basic Function)] → [File Commander] → [CONTINUE] → [CONTINUE WITH ADS]

2 Tap a category to be displayed → Tap a file → Tap data
Data is viewed/played.

* Copyrighted data on the previously used au phone cannot be transferred to the product. However, some Chaku Uta Full®, Video Clip, Chaku Uta Full Plus® may be able to be transferred and played on the product with the same phone number by backing up with LISMO Port Ver 4.2 or later.

Battery Settings

■ Setting Battery saver

Control operations by vibrator, location information service, etc. to save battery consumption.

1 Home screen → [基本機能 (Basic Function)] → [Settings]

2 [Battery saver]

3 Set to "ON"

4 [Turn on automatically] → [Never] / [at 5% battery] / [at 15% battery]
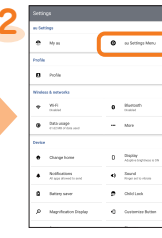

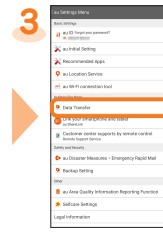

■ Setting Battery care mode

Battery life is extended by not fully charged.

1 Home screen → [基本機能 (Basic Function)] → [Settings]

2 [Battery] → [ ] → [Battery care mode]

3 Set to "ON"

Transferring data from au Settings Menu

Restore/back up data from/to your previously used au phone to/from this product using a microSD memory card or the au server.
• To restore data using the au server, store the data from the old au phone to the au server beforehand. Setting au ID is required for using the au server (If the old au phone does not have au Settings Menu, use auCloud app).
• For restoring data using a microSD memory card, save the data to the microSD memory card using the old au phone in advance (If the old au phone does not have au Settings Menu, use au backup app).

1 Home screen → [基本機能 (Basic Function)] → [Settings]

2 [au Settings Menu]

3 [Data Transfer]

4 Tap " 機種変更はこちら (For model replacement)" and transfer data according to the guidance on the screen.

Using "Data Storage App"

To use "Data Storage App" to back up photos, etc. to the au server automatically, set as follows.

Home screen → [基本機能 (Basic Function)] → [Settings] → [au Settings Menu] → [Backup Setting] → Select a data type to back up automatically
